DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with I. Zborovsky on September 24, 2009. The application has been amended as follows:

In claim 1, line 1, delete "A device for locking an electrical device with a battery pack by thrusting the battery pack into the electrical device toward a final locking the device comprising" and change to "A battery pack for locking an electrical device by thrusting the battery pack into the electrical device toward a final locking, the battery pack comprising:"

In claims 2-8, line 1, delete "device" and change it to a "battery pack."

Allowable Subject Matter

2. Claims 1-26 are allowed. The following is an examiner's statement of reasons for allowance: No prior art teaches a battery pack for locking an electrical device with a battery pack into the electrical device toward a final locking, the battery pack comprising a locking bar, two recesses configured with a first set, second set and a third set as recited in the claim.

The closest prior art is Komiyama (U.S. Pat. No. 5,621,618). Komiyama teaches a device for locking electrical devices with battery packs for power supply with one movable locking bar with two recesses, but is silent about the locking bar and the two recesses are configured in a first set, second set and third set for engaging the locking bar (see col. 3, lines 30-47; fig. 2C). Komiyama is further silent about the locking bar having two recesses located one after the other in the direction of relative motion as the battery pack is being locked to the electrical device where the two recesses are offset transversely to the direction of motion and are detent grooves with a cutout for receiving the protrusion.

Other references considered were Fischer et al. (U.S. Pat. No. 6,168,881) and Song et al. (U.S. Pat. No. 7,476, 462).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
